

Quality Policy

DNA Script is committed to revolutionizing DNA-write technology through its enzymatic technology to enable the future of genomics research and personalized medicine.

We promote a culture of quality by training our employees, supporting innovation, and working collaboratively to achieve our quality objectives:

Customer Satisfaction

Meet and exceed customer expectations by delivering high quality products and services aligned with internal procedures.

Continuous Improvement

Continually improve our product offering and quality management system by evaluating performance, suitability, and risks.

Compliance

Ensure the quality management system aligns with ISO 9001 and meets all applicable regulatory requirements.

Marc Montserrat
CEO
